

SAP HANA 2.0 Training

Advanced Modelling

Explore the advance Modelling capabilities with SAP HANA 2

SAP HANA 2.0 Training

SAP HANA 2.0 Training

Course Highlights

- Lesson 1: Architecture of SAP HANA
- Lesson 2: Core Modelling with WEB IDE – XSA – Information Views
- Lesson 3: Modelling Functions: Hierarchies, Variables, and Currency Conversion etc.
- Lesson 4: SQL Script and Procedures: SQL, Table Functions, Procedures
- Lesson 5: SAP HANA Live: VDM(Virtual Data Model), SAP HANA Shine
- Lesson 6: Performance Optimization: Explain Plan, Visualize Plan and Timeline View
- Lesson 7: SAP BI with HANA: Webi, Design Studio, Lumira, Analysis for office, Crystal Reports
- Lesson 8: SAP HANA XS Advanced: WEB IDE,
- Lesson 9: Advanced Modelling: Predictive, Text Analysis, Spatial, Graph Processing
- Lesson 10: SAP S4HANA CDS Modelling: Core Data Services
- Lesson 11: HANA Administration: HANA Cockpit, Backup Recovery
- Lesson 12: Application Development with HANA
- Lesson 13: Security, Administration and Maintenance of SAP HANA
- Lesson 14: SAP HANA Vora: HANA with Hadoop
- Lesson 15: SAP HANA Leonardo: AI, Block Chain – Digital Innovation with HANA
